

Perfume Composer

Quick Start Guide — Two-Column Mini Poster

Welcome to Perfume Composer — your creative workstation for crafting fragrances. This compact guide covers everything you need to know to start composing, printing, and managing your scent creations.

Getting Started

- **■ Step 1 — Launch & Layout:** Open Perfume Composer. The Fragrance Bank appears on the left and the Recipe workspace on the right — your two main panels.
- **■ Step 2 — Add Fragrances:** Use Fragrances → Add Fragrance to add ingredients with their note type, price, and IFRA limits. You can also import CSV fragrance lists.
- **■ Step 3 — Create a Recipe:** Double-click or drag fragrances from the bank to the recipe panel. Enter quantities; percentages, costs, and IFRA compliance update instantly.
- **■ Step 4 — Save & Export:** Save your recipes as JSON files or export elegant PDFs. You can reopen or print them anytime from the menu.
- **■ Step 5 — Print Labels:** Use Recipes → Print Label to design and print perfume labels. Supports Bluetooth printers like the Phomemo D30 with adjustable frames and offsets.
- **■ Step 6 — Customize Themes:** Toggle between light and dark modes from View → Toggle Theme. Your choice is remembered next time you launch the app.

■ Keyboard Shortcuts

- Ctrl + S — Focus search bar
- Ctrl + Z / Ctrl + Y — Undo / Redo
- Ctrl + Shift + C — Clear Recipe
- Ctrl + D — Edit Fragrance Description
- Double-click — Add fragrance to recipe
- Right-click — Context menu actions

■ Helpful Tips

- Hover over IFRA percentages to check compliance warnings.
- Your last fragrance bank reloads automatically when you reopen the app.
- All data is stored in your Perfume-Composer folder (Documents or home).
- Delete config.json in that folder to reset preferences or themes.

Perfume Composer — Where Science Meets Art.
